

Class 10 Science — Easy Practice Set

100 Questions | Level: Easy

StudyShelf — studysshelf practice worksheet. Answer key provided at the end.

- Q1. Name the process of loss of water from aerial parts of plants.
- Q2. Name the process by which caterpillars transform into butterflies.
- Q3. Name the group of elements with 8 electrons in the outermost shell that are unreactive.
- Q4. Name the disease caused by iodine deficiency.
- Q5. What is the chemical formula of hydrochloric acid?
- Q6. What device converts solar energy directly into electricity?
- Q7. What is the chemical name of vinegar?
- Q8. What is the general name of a chemical reaction where a precipitate forms?
- Q9. Name the part of the brain that controls balance of the body.
- Q10. Name the gas used in balloons because it is lighter than air and non-flammable.
- Q11. Name the smallest blood vessels in the human body.
- Q12. What is the term for an organism's ability to respond to a stimulus?
- Q13. What is the term for the chemical breakdown of complex food into simpler substances?
- Q14. Name the process by which a solid changes to liquid on heating.
- Q15. Name the process by which new plants grow from parts like stems, roots or leaves.
- Q16. Name the vitamin whose deficiency causes night blindness.
- Q17. Name the SI unit of electric current.
- Q18. What is the chemical formula of quicklime?
- Q19. Name the structure in a cell that controls all cellular activities.
- Q20. Name the process by which unicellular organisms reproduce by simple cell division.
- Q21. What is the term used for the bending of light when it passes from one medium to another?
- Q22. Name the device used to produce electricity from mechanical energy.
- Q23. What is the term for a substance that speeds up a reaction without being consumed?
- Q24. What device is used to measure electric current in a circuit?
- Q25. Name the fluid connective tissue in the human body.
- Q26. What is the unit of electric potential difference?

- Q27.** What is the chemical formula of nitric acid?
- Q28.** What is the chemical formula of methane?
- Q29.** Name the two kingdoms into which organisms were traditionally classified.
- Q30.** Name the process by which plants prepare their own food.
- Q31.** What is the chemical name for rust?
- Q32.** Name the tube that carries urine from the kidney to the bladder.
- Q33.** Name the part of a neuron that receives signals from other neurons.
- Q34.** What is the valency of carbon?
- Q35.** Name the disease of the eye corrected by using a convex lens.
- Q36.** Name the type of mirror used in vehicle side mirrors.
- Q37.** What type of lens is used to correct myopia (short-sightedness)?
- Q38.** What is the term for organisms that manufacture their own food?
- Q39.** What is the chemical formula of slaked lime?
- Q40.** Name the plant hormone responsible for cell elongation.
- Q41.** What is the SI unit of work and energy?
- Q42.** What is the process of a solid changing directly into gas called?
- Q43.** What is the common name for calcium sulphate hemihydrate?
- Q44.** What is the unit of frequency?
- Q45.** Name the male reproductive organ that produces sperms.
- Q46.** Name the gas evolved when a metal reacts with a dilute acid.
- Q47.** Name the layer of the atmosphere that protects us from harmful UV rays.
- Q48.** What is the SI unit of power?
- Q49.** What is the common name of the compound CaCO_3 ?
- Q50.** Name the gas that turns lime water milky.
- Q51.** Name the hormone released during a stressful or emergency situation.
- Q52.** What is the name of the DNA-containing structures in a cell nucleus?
- Q53.** What is the chemical formula for ethanol?
- Q54.** What is the other name for Mendeleev's Periodic Law element arrangement basis?
- Q55.** What is the common name of Sodium Hydrogen Carbonate?

- Q56.** Name the phenomenon due to which a pencil appears bent in a glass of water.
- Q57.** What gas is used in the manufacture of fertilisers, mainly ammonia?
- Q58.** Name the part of a plant cell responsible for photosynthesis.
- Q59.** Name the process by which water moves up in plants through xylem.
- Q60.** Name the smallest unit of a compound that has all its properties.
- Q61.** Name the hormone that regulates blood sugar level.
- Q62.** What is the common name for Sodium Chloride?
- Q63.** Name the process of splitting of nucleus in an atom.
- Q64.** What is the term for the mixture of metals?
- Q65.** What is the unit used to measure electrical energy consumed at home?
- Q66.** Name the scientist who proposed the Periodic Law based on atomic mass.
- Q67.** Name the hormone secreted by the thyroid gland.
- Q68.** What is the reducing agent commonly used in the extraction of iron?
- Q69.** What is the chemical name for table salt?
- Q70.** What is the term for organisms that live in and derive nutrition from another living organism?
- Q71.** What is the process called when light bounces back from a surface?
- Q72.** What is the pH of a neutral solution?
- Q73.** Name the process by which sperm and egg fuse to form a zygote.
- Q74.** Name the vitamin whose deficiency causes scurvy.
- Q75.** Name the metal that is liquid at room temperature.
- Q76.** Name the hormone deficiency that causes diabetes.
- Q77.** What is the unit of resistance?
- Q78.** Name the type of fission where an organism splits into two equal halves.
- Q79.** What is the unit used to express the power of a lens?
- Q80.** Name the tissue in animals that connects muscles to bones.
- Q81.** Name the tissue that transports food in plants.
- Q82.** Name the part of the flower that develops into a fruit after fertilisation.
- Q83.** What is the chemical formula of washing soda?
- Q84.** Name the acid present in tomato.

- Q85.** What is the functional unit of the kidney called?
- Q86.** Name the acid found in an ant's sting.
- Q87.** What is the unit of magnetic field strength?
- Q88.** What is the common name for the compound CaOCl_2 ?
- Q89.** What is the chemical formula of baking soda?
- Q90.** What is the term for the loss of electrons during a chemical reaction?
- Q91.** Name the connective tissue that joins one bone to another.
- Q92.** Name the gas responsible for the greenhouse effect mainly.
- Q93.** What is the chemical formula for glucose?
- Q94.** Name the largest gland in the human body.
- Q95.** What is the biological term for the study of heredity?
- Q96.** What is the name given to the fusion of a male and female gamete?
- Q97.** What is the SI unit of pressure?
- Q98.** Name the type of reaction in which heat is absorbed.
- Q99.** Name the muscular organ that pumps blood in the human body.
- Q100.** Name the green pigment present in plants.

Answer Key

1. Transpiration
2. Metamorphosis
3. Noble gases
4. Goitre
5. HCl
6. Solar cell/Photovoltaic cell
7. Dilute acetic acid
8. Precipitation reaction
9. Cerebellum
10. Helium
11. Capillaries
12. Irritability/Responsiveness
13. Digestion
14. Melting/Fusion
15. Vegetative propagation
16. Vitamin A
17. Ampere
18. CaO
19. Nucleus
20. Binary fission
21. Refraction
22. Generator (dynamo)
23. Catalyst
24. Ammeter
25. Blood
26. Volt
27. HNO₃
28. CH₄
29. Plantae and Animalia
30. Photosynthesis
31. Hydrated iron(III) oxide
32. Ureter
33. Dendrite
34. 4
35. Hypermetropia (long-sightedness)
36. Convex mirror
37. Concave (diverging) lens

38. Autotrophs
39. $\text{Ca}(\text{OH})_2$
40. Auxin
41. Joule
42. Sublimation
43. Plaster of Paris
44. Hertz (Hz)
45. Testis
46. Hydrogen gas
47. Ozone layer
48. Watt
49. Limestone/Marble/Chalk (calcium carbonate)
50. Carbon dioxide
51. Adrenaline
52. Chromosomes
53. $\text{C}_2\text{H}_5\text{OH}$
54. Atomic mass
55. Baking soda
56. Refraction of light
57. Nitrogen
58. Chloroplast
59. Transpiration pull
60. Molecule
61. Insulin
62. Common salt
63. Nuclear fission
64. Alloy
65. Kilowatt-hour (kWh)
66. Dmitri Mendeleev
67. Thyroxine
68. Carbon monoxide/Coke
69. Sodium chloride
70. Parasites
71. Reflection
72. 7
73. Fertilisation
74. Vitamin C
75. Mercury
76. Insulin deficiency

- 77. Ohm (Ω)
- 78. Binary fission
- 79. Dioptre (D)
- 80. Tendon
- 81. Phloem
- 82. Ovary
- 83. $\text{Na}_2\text{CO}_3 \cdot 10\text{H}_2\text{O}$
- 84. Oxalic acid
- 85. Nephron
- 86. Formic acid
- 87. Tesla
- 88. Bleaching powder
- 89. NaHCO_3 (Sodium bicarbonate)
- 90. Oxidation
- 91. Ligament
- 92. Carbon dioxide
- 93. $\text{C}_6\text{H}_{12}\text{O}_6$
- 94. Liver
- 95. Genetics
- 96. Fertilisation
- 97. Pascal
- 98. Endothermic reaction
- 99. Heart
- 100. Chlorophyll
